**MEDIOX Orvosi Műszergyártó Kft**

### Features :

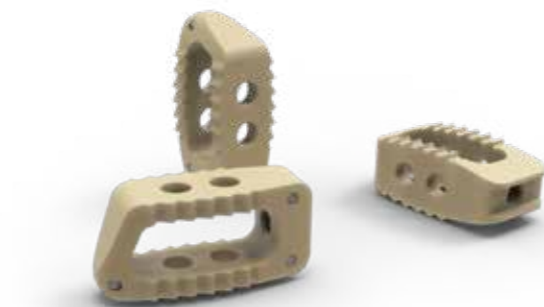

- Anatomical shape, convex superior/inferior surfaces that closely stick to patient anatomy.

- Teeth, provides resistance to implant movement.

- PEEK-OPTIMAL LT1 material per ASTM F2026, comparable elastic modulus to human bone provides resistance to implant subsidence, radiolucent material allows clear assessment of bony fusion.

- Tantalum marker pins, allow easier visualization of implant than titanium alloy.
